Information Items

• 2012 Greenhouse Gas inventory underway. Expect results May 2014.
• New LEED Living Laboratory course designed by College of Design, Poole College of Management and University Sustainability Office. Students will sit for LEED exam and work on Nelson Hall as a real-world project.
• Planning additional energy management measures to address projected utility deficit by year end.

Next meeting: March 25
Standing meetings are Tuesdays at 10:30 every 4-6 weeks

Change Your State

for a better you, NC State and world

Change Your State

Get moving

Losing just 30 minutes a day is one of the best things you can do for your body. It'll help you burn calories and slim down. Start walking in the morning, lunch or after work. It's easy to get started.

Toss the toxins

Some personal care or household products can be harmful to your health. Read labels and do the research to find healthier choices. If you can't buy a product, try making your own. Natural ingredients work just as well as store-bought versions.

Taste the difference

You are what you eat and drink, so keep it real. Drink more water and less sodas. Eating fruits and veggies is important. Fruits are healthier than preserved foods. Pack your lunch with veggies and fruits to keep your energy up all day long.
