

10:30 Welcome - Bill Winner

10:35 Meet a Net Impact leader - Clay Giese, VP Finance & Operations, Graduate Net Impact Chapter

10:40 Sustainability progress comparison to peer institutions - Ashley McCraney, Pack Link project lead

11:10 2016-2020 SSP planning and discussion- Jack Colby

11:40 Tactic updates (carried over from previous meeting) – Bill Winner

- Academics and Research – Bill Winner
- Land use – Lisa Johnson

11:50 Announcements – Bill Winner

Information Items

- Robert Davis is the 2015 Earth Month chair

Next meeting: Mar. 27

Standing meetings are Fridays at 10:30 every 4-6 weeks

February is wellness month March is water month

The screenshot shows the 'Change Your State' website for NC State Earth Month. The main heading is 'Change Your State for a better you, NC State and world'. The navigation bar includes categories like WHY?, FOOD, ENERGY, ZERO WASTE, TRAVEL, WELLNESS, WATER, and NC STATE EARTH MONTH. The current page is titled 'Water' and features a large image of a waterfall. Below the image, there is a paragraph about water shortages and three tips: 'Shorten Your Shower', 'Turn off the Tap', and 'Fix it Fast'. The right sidebar contains a search bar, 'LATEST WATER BLOGS' with links to articles like '19 Things You Won't Regret When You Get Older', and 'GET THE LATEST UPDATES' with social media icons for Facebook, Twitter, and an app.

WHY? FOOD ENERGY ZERO WASTE TRAVEL WELLNESS WATER NC STATE EARTH MONTH

Water

We all need water, but water shortages are becoming more common in the United States and around the world. Only about 1 percent of the Earth's water can be consumed by humans, so do your part to save this necessary but limited resource.

- Shorten Your Shower**
Nearly 1 in every 5 gallons of water used indoors in the United States goes down the shower drain. So if you didn't think that 25-minute shower you take matters, think again. Set a timer to see how long you really do stay in the shower (it's longer than you think). A 10-minute shower is about 25 gallons of water. Every minute you shorten it, you save 2.5 gallons. Seriously, try it.
- Turn off the Tap**
Did you know that most people use 70 gallons of water a day? In the bathroom, turn off the tap while shaving or brushing teeth. And if you wash dishes by hand, slow the flow while you're scrubbing. By turning off the tap while you're not actually using water, you'll reduce your daily water use.
- Fix it Fast**
Small leaks can add up to gallons of water lost per day. Common types of leaks include leaking toilet flappers and dripping faucets.
